

Our line of CICLO receptacles has been developed to meet the requirements of both urban furniture as well as corporate equipment. Made with a 2 mm thick perforated sheet, this CICLO receptacle is not only a product with high durability and service life, but it also conceals the trash bag almost to the point of making it invisible by the naked eye, without affecting the product design.

CICLO's design allows for easy identification of standard waste or the separation of glass, paper, and plastic for recycling.

NOMEN Design specializes in the design, development and production of urban and corporate furniture and equipment. Our site furnishings are created with a focus on design quality, and harmony with the environment.

MATERIALS

Cold Rolled Carbon Steel

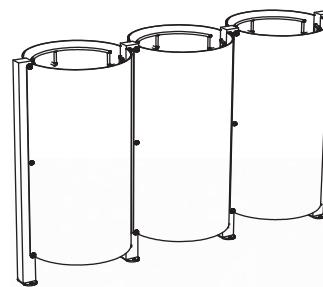

Custom colors available upon request
