

# Nigel

The Nigel is a receptacle that is urban by nature, designed around a 2 mm thick metal sheet able to withstand all types of maltreatment. The inner metal rings allow you to place the trash bag inside without being visible to the public.

This is a product designed for high durability and long service life without ignoring functionality or aesthetics. Because of its durable nature, the Nigel litter receptacle can be used in municipal, public, semi-public corporate and urban spaces with a high volume of people.

Its stainless steel structure makes it the best solution in areas near the sea where there are higher rates of corrosion.

NOMEN Design specializes in the design, development and production of urban and corporate furniture and equipment. Our site furnishings are created with a focus on design quality, and harmony with the environment.

## MATERIALS
