

origo

Applicable to all types of environments, the Origo receptacle is characterized by its functionality and aesthetics. Its 3 mm sheet thickness ensures anti-vandalism and a long service life.

Easily used for selective waste collection, the Origo is perfect in municipal and urban furnishings, as well as a variety of enterprises, companies and other sophisticated settings.

Unlike traditional urban receptacles, the fastening elements of the waste bag are located inside the drum, and not exposed to public view. This contributes to the aesthetics of the Origo and allows it to fit naturally in any environment.

NOMEN Design specializes in the design, development and production of urban and corporate furniture and equipment. Our site furnishings are created with a focus on design quality, and harmony with the environment.

MATERIALS

Cold Rolled Carbon Steel

Custom colors available upon request
